TRUSTCITED · AI SEARCH CHECK

What does AI say when buyers ask for you? SAMPLE

Business: an Indian billing & accounting software company (name withheld) · Checked: Nov 2026 · Tool: Google's AI answer

1. The question a buyer asks

"best GST billing and accounting software in India"

2. Who the AI named

1 TallyPrime	2 Zoho Books	3 Vyapar
4 BUSY	5 Marg ERP	6 myBillBook

This business was not named, although it sells exactly this product.

3. The three fixes to look at first

1. **An "at a glance" page AI can quote.** Who it's for, price, key GST features and integrations, stated plainly on your own site.
2. **Be on the pages AI reads.** Review sites and "best software" lists shape these answers. Get listed with the same facts everywhere.
3. **Make your facts machine-readable.** Structured data on the site, and a consistent Google Business Profile and directory listings.

The free check (this page)

- 3 real buyer questions
- Who AI names instead of you
- The 3 fixes that matter most

The full check

- 20 questions × 6 AI assistants (ChatGPT, Google AI Mode, Gemini, Perplexity, Claude, Grok), 3 runs each
- The sources AI relies on
- A prioritised fix list, done with your team

4.7% → 57% B2B platform in India, in about three months.

17% → 73% K-12 school in India, in about five months.

raghav@trustcited.com

This sample uses one real question and one run. AI answers vary between runs, which is why the full check asks each question three times.
